

# Get Stripe API keys

Users with [Administrator permissions](#) can access a Stripe account's API keys by logging in the [Dashboard](#) and navigating to the Developers section of the Stripe dashboard and clicking on [API Keys](#).

The screenshot shows the Stripe API Keys dashboard. On the left is a sidebar with navigation options: Home, Payments, Balances, Customers, Connected accounts, Products, Reports, Developers (with sub-items: API keys, Webhooks, Events, Logs), View test data, and Settings. The main content area is titled "API keys" and includes a link to "Learn more about API authentication". It features a toggle for "Viewing live API keys" (currently on) and "View test data" (currently off). Below this are two sections: "Standard keys" with a "+ Create secret key" button and a table of keys, and "Restricted keys" with a "+ Create restricted key" button and a table showing "No restricted keys".

NAME	TOKEN	LAST USED	CREATED	
Publishable key	[REDACTED]	Apr 30, 2019	Aug 22, 2017	...
Secret key	[REDACTED] <span>Reveal live key token</span>	—	Sep 25, 2017	...
